

No need to worry about your medical records

Helping doctors and patients

We are here to help you improve your health

Register now Login

How our website works ?

Healthsync stores the medical history of any patient and giving each patient a sync number just like an aadhar number. This unique id can be easily used by doctor to access all past medical reports of the patient. The user just needs to upload the medical report which is very easy just by clicking the image of the report.

Check your health for free

Heart test

2 min test which finds out the probability of you having heart disease.

Diabetes test

2 min test which finds out the probability of you having diabetes.

Upload

Upload your medical records.
